

Udoka Kenneth Nkwocha

<http://udoka.me/> writeudo@gmail.com </udokah> </thisisudo>

Passionate about learning and building stuff for the web. Able to understand business requirements, prioritise work based on highest business value and work with teams to solve problems.

Experience

Software Engineer (Front-End) at Zalando SE Feb 2017 - Present

Working on tools to increase developer productivity. Building apps using Micro-service for frontend architecture. Setup monitoring and tracking to gain more insights & visibility into user behaviour.

NodeJS React Redux SCSS Javascript ES6
Webpack AppDynamics Google Analytics zalando.de

Software Developer at Andela Feb 2015 - Feb 2016

Built apps to track and manage the placement of developers on client engagment. Built an internal app integrated with Slack to manage the usage of available laundry machines. I also helped support Andela's Now We Give initiative, a program that offers to build websites for clients in exchange for charitable donations.

NodeJS AngularJS Firebase MongoDB Ruby On Rails
Javascript CSS3 PostgreSQL andela.com

Frontend Developer at Botosoft Tech LTD Jun 2014 - Aug 2014

Onsite consulting. I worked closely with UI designers to create awesome user interfaces offering an intuitive user experience. My roles involved tranforming designs and sketches to semantic HTML/CSS code equivalent.

HTML5 CSS3 Javascript jQuery www.botosoft.com

Front-End Developer at virtualQ GMBH Feb 2016 - Jan 2017

Migrated core company products - dashboards and 3rd party embeddable widgets - from Ruby (Rails) to Javascript (React) while supporting multiple languages English and German. Created charts using D3 provide more insights to customers.

NodeJS React Redux SCSS D3 virtualq.io
